Open Source GUI Application for special purposes

🏃 Running

- Install Python.
- Execute **extracting-algo.exe**
- The rest is self-explanatory.

> If you think it isn't, please update this README!

🏗 Building

Build requirements:

- .NET 6.0
- Visual Studio 2022

> Older versions could work.

- From your pip install, copy the "pip" folder into "extracting-algo\bin\Release\net6.0-windows".
- Do the same with main.py in root.
- Open the VS project.
- Set the mode to release.
- Click "Run without debugging"

🤝 Contributing

- Fork and clone this repository.
- Create a branch.

Please keep the code as clean as possible.
